

## How to access videos on Discovery Education: United Streaming

**Goto:** <http://streaming.discoveryeducation.com/>

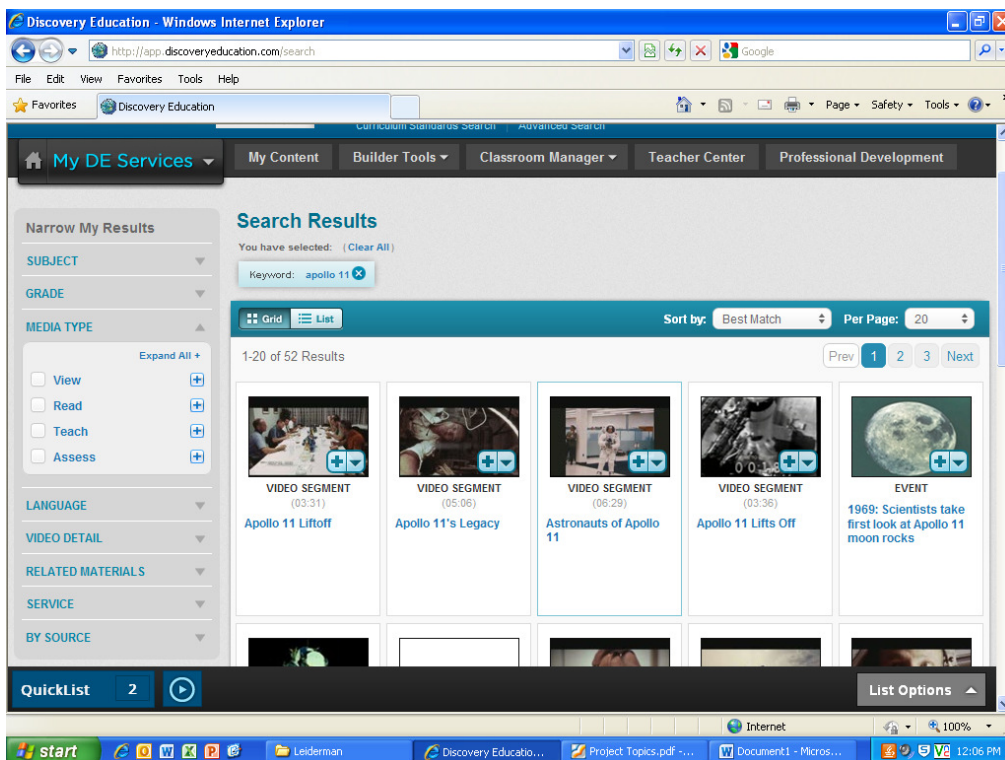

**Login:** mleider

**Password:** mustangs

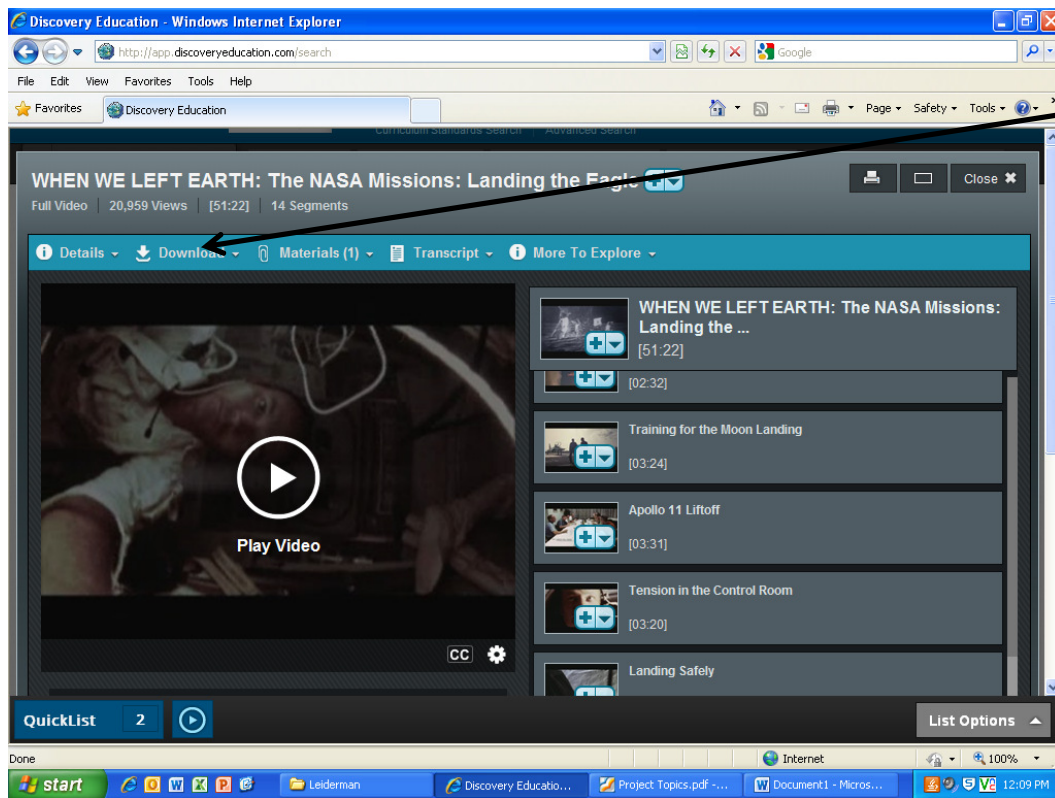

**Go to “Search” box at top and type in the topic you need videos on**

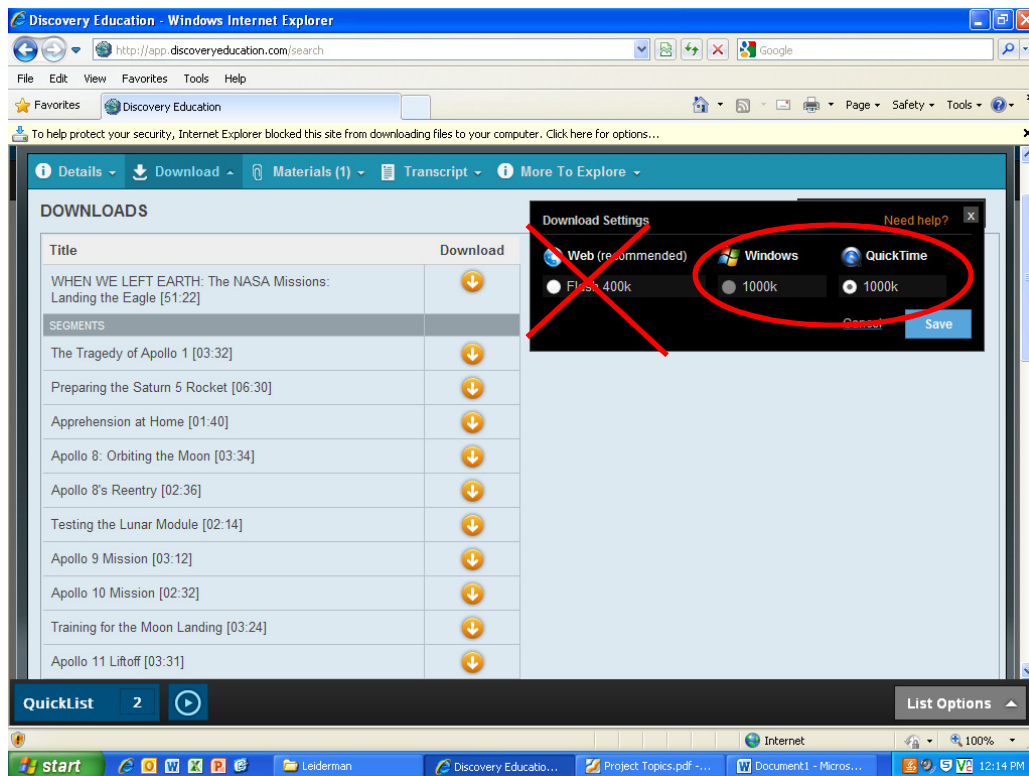

**Get search results. You mainly want “Video Segments” because they’re already semi-edited down from bigger videos.**

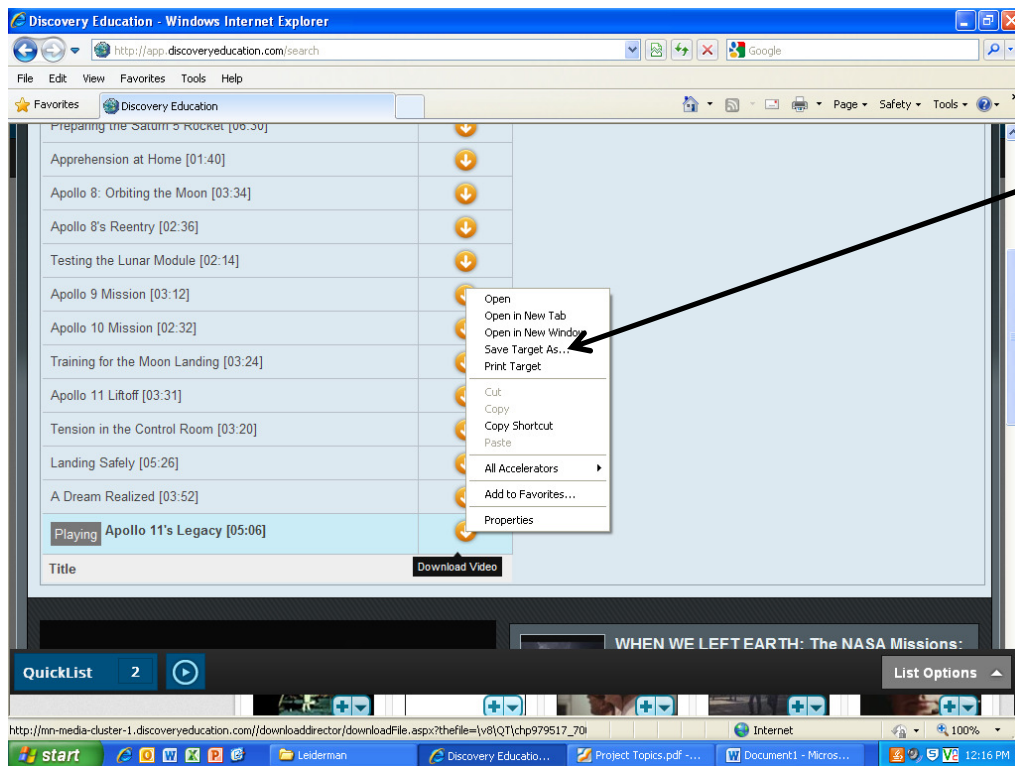

Click on a video segment that looks good... preview the video and if you want to use it, click the “Download” button

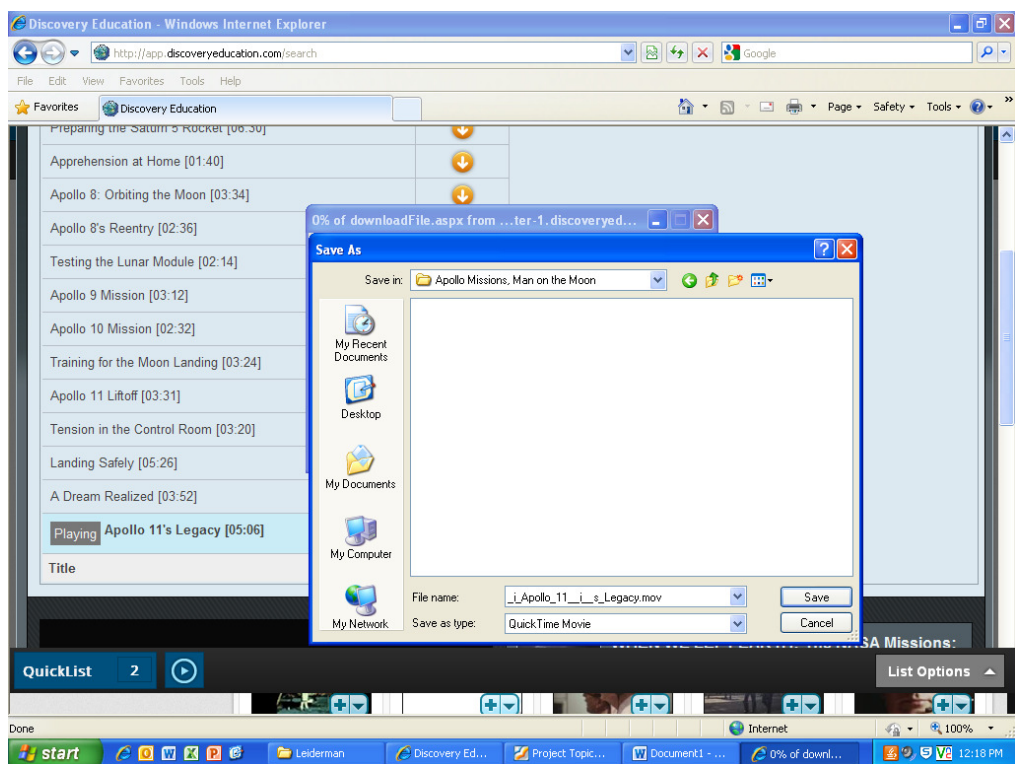

Make sure to change the file type to Quicktime (not editable) or Windows (editable but most videos are not available in this file type)... Flash files WILL NOT WORK (so don't download them...).

**Right click the arrow of the segment you want to download. Choose “Save Target As...”**

**Save the file in YOUR folder on the shared drive under your period number.**

**You can now add the file as it is to your project OR (Windows file only) import it into Windows Movie Maker to edit or modify it!**
